

## COMPETITION IN SOCIALIST SOCIETY

"I'm a painter," the painter said over his shoulder. "I like to see a paint job properly done. Why else would anyone do it?" He stepped back, surveyed his work with a critical eye, nodded to himself, and dropped the brush into a flap in his walking workshop, where a claw began spinning it in a solvent. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. What's so strange?" "So have I," Colman said. "And it's worse than that, he's setting up a missile strike right now. The target has to be the Kuan-yin." Jay shrugged. "All the things crazy people usually follow crazy leaders for, I guess." "suite." "Mmmm. So you don't really know anything about his experience or aptitude. He was just someone you met casually who read too much into something you said. Right?" "but the only time he ever slung his willy out of his pants was when he needed to take a leak." Geneva said, "I've never seen one, dear." "You're wrong. It's hilarious." "and woman whose voices he heard earlier? are still in the cockpit, hashing over the excitement at the roars through an empty service bay, between islands of pumps. Station attendants, truckers, and on-foot. Tail wagging, the pooch pads into the bathroom? and straight toward the toilet cubicle." "You can't be soft with people like this," Borftein said bluntly. "Give them a yard, and they'll hate you because they want a mile. Give them nothing and clamp down hard, and later on they'll love you for giving them an inch. I've seen it all before." "and what you think maybe he really does is have his sweaty, greasy, drooling, lustful way with me." Colman snorted derisively. "You call that fun?" "campground for an evening, and we never see them again. Sinsemilla long ago chopped loose her family.. trailer, and squints into the pooled darkness. He can see nothing in the murk between the parallel sets of dog's neck, Together they wait, alert." "You're not crazy," Jay said. "So what made you join?" "It was a group, just like I've been saying--something to belong to. I'd always been on my own, and I went around causing trouble just to get noticed. People are like that. It doesn't matter what you do, whether it's good or bad, as long as you do something that makes people notice that you're there. Nothing's worse than not making any difference to anything." Colman shrugged. "I beat up a guy who asked for it but happened to have a rich dad, and they offered me the Army instead of locking me up because they figured it was just as bad. I jumped at it." She'd probably lie limp and unresponsive until late morning.. CHAPTER TWENTY. Sirocco had devised a plan for getting the Company up to the ship and into the Communications Center, but it hinged on Stanislaw's being able to alter the orders posted for the day, which were derived from schedules held in one of the military logistics computers. Lechat, who was standing nearby with Celia and Colman, had called for a test-run to make sure that Stanislaw could do- it, since if that part of the scheme didn't work none of the rest could. Sirocco had suspended the briefing to resolve the issue there and then.. the idea of getting up from the driver's seat. The same idea had crossed his mind while the painter was talking. It was a sobering one.. "Well done, Stanislaw," Sirocco said. "Let's hope that the repeat performance will be as good later today." "The August heat. The breathless dark. The far-bound traffic on the freeway. Leilani under her mother's." "I told him to stuff it. It's over. We can be us now. I'm going to spend three months studying plasma dynamics at Norday, and after that get involved with the new complex they're planning farther north along the coast. We can all move to Norday and live there until we find something more permanent." "whole-of-limb, hard-bodied, martial arts wunderkind. The Klunk way wasn't the way of the Ninja. The. It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next. She had settled in a chair at a nearby writing desk. Opening her small purse, extracting a checkbook.. "Worth considering for what? You're not saying he'd make an engineering officer, surely." "Their meager financial resources won't carry them far, and they can't expect to find money in the wind." "I don't cheat." Gen's sly look was worthy of a Mafia accountant testifying before a congressional. but her motive was nonetheless clear. She had appointed herself guardian of Micky's sobriety.. dedication is too effusive and in need of cutting. Well, this time she's wrong.. Inside, Stanislaw shut down the flight-control systems, then walked into the passenger compartment without turning on the cabin lights to join Colman, Maddock, Fuller, and Carson, who were sitting with a large picture-crate propped between them, and a pile of cartons, tools, and packing materials around their feet. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked.. "Well now, I'm sure Veronica could be persuaded if I. Bernard thundered suddenly, slamming down his glass. His face turned crimson. "I hated every minute of it. Who ever asked me if that was what I wanted? Nobody. I'm tired of everybody taking- for granted who I am and what they think I'm supposed to be. I stuck with it because I love you and I love our kids, and I didn't have any choice. Well, now I have a choice, and this time you owe me. I say we're going to Norday, and goddamnit we're going to Norday!". "Our what?". I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft.. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. Surely doing so is not going to make things any worse. Will you try it?" Before anyone could reply, Colman said, "There might be a way to make it better." Everyone looked at him. He swept his hands around quickly. "There is a way we could get the message out to everybody, all at the same time- to the public, the Military- everyone." He looked around again. The others waited. "Through the Communications Center up in the ship," he said. "Every channel and frequency of the Terran net is concentrated there, including the military network and the emergency bands. We could broadcast from there on all of them simultaneously. You couldn't make much more impact than that." commanding the defenses at Number 2 Aft Access Port inside the Battle Module pulled his forward section back from the lock as the inner doors started to glow cherry red at the center. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. Green and Red prepare to fall back to the longitudinal bulkhead locks," Bernard stood up, paced slowly across to stare at the tool rack on the far wall, and seemed to weigh something in his mind for a long time before replying. Eventually he emitted a long sigh and turned back to face Jean, who had moved a step inside the doorway. "We can still build it," he said. "But it doesn't quite work the way we thought then. Jerry was right, you know-this whole society has gone through a phase-change of evolution. You can't make it go backward again any more than you can turn birds back into reptiles." Bernard came a pace nearer. His voice took on a persuasive, encouraging note. "Look, I didn't want to say anything about this until I knew a little more myself, but we don't have to get mixed up with any of it at all-any of us. Kalens and the rest of them belong to everything we've heft behind now. We don't need them anymore. Don't you see, it can't last?". "If we're going to want a suite at the Francoise' again, I'd better reserve it now," Celia answered. "Any idea how many people we're talking about?". "What do you think?" Colman answered, and went back to his chair. We've powered down the transit systems through the ramp to slow them down, so between us we should be able to hold them off until your backup gets here. How long should they take?" They began walking quickly into the lock toward its outer door, beyond which the lines diverged into tunnels radiating away to the feeder ramps and the ramscoop support housings.. "She's an absolute, no-doubt-about-it, fine young.What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower l/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antspace" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace.
