"Neither one of those facts is so incredible compared to some of the strange things in this world," said Amos. "Why are you the Prince of the Far Rainbow, and why are you a prisoner?" She tugged at the lock of hair over her temple again. "By that time, it will be Selene's decision." "Jack, is Peg in there?" I drew picket duty again this morning. Ike picketed with me, having arranged it with the Organizer to honest-to-god conversation, spontaneous, unstructured, and all his own. The inner lock door was pulled open, and there was McKillian, squinting into the bare bulb that lighted the lock while she held her shirt in front of her with one hand. The cornice of the building was the motto, which he had never noticed before, of the Federal. The Podkayne was barely visible behind a network of multicolored vines. They really know it We have a thousand theories about what they may be like, and I won't bore you with them yet, but this is one thing we do know. They can build anything they need, make a blueprint in DNA, encapsulate it in a spore and bury it, knowing exactly what will come up in forty thousand years. When it starts to get cold here and they know the cycle's drawing to an end, they seed the planet with the spores and ... do something. Now I must get back to Zorphwar. Twenty more successful missions, and I move up to Sector Commandant! "There's one like it on mine." "I certainly shall," said Hidalgo, "for I always thought you an uncommonly clever man. Your return." All right, but including the two you've already written. For instance, a while back when watching a 1944 epic called Weird Woman, I realized that here was a version of Fritz Leiber's Conjure Wife that I hadn't run into before. The story (of the use of magic by faculty wives in that most mundane of settings, the Ameri-It seemed self-evident to him that nobody in his right mind would want to get killed, or to be sent to places he'd never heard of by people he'd never met in order to kill other people he didn't know. Therefore nobody in his right mind would be in the Army. But since the Army was full of people whom it had judged to be acceptably sane and normal, it seemed to follow that the Army's ideas of what was normal had to be very strange. Now, to transfer into something like Engineering seemed on the face of it to be a perfectly natural, reasonable, constructive, and desirable thing to want to do. And that seemed enough to guarantee that the Army would find the request unreasonable and him unsuitable.
