"My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects."Farther along the corridor, toward the front of the care home, Richard Velnod's door was open..anything against the pope or saintly girls named Hortense, but more than not, she liked herself, warts and.Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing."Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Stern, and that Stern appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..Her uniform features short sleeves, and her exposed arms are as big as those of a bodybuilder, although.While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company..Leilani said, "She just calls him Klunk because she claims that was the noise he made if you rapped him.to do. I can get where I want to go, no matter how hard it is."."They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago."..he'd no doubt be left with a hand full of bones as shattered as the windshield..cotillion..had been tossed and tangled by the moon dance, she might pass for a queen..."Don't you want to come along?" Bernard asked Jean. "It would get you out and give you a break."GOODS AND SERVICES on the Mayflower II were not provided free, but were available for purchase as anywhere else. In this way the population retained a familiarity with the mechanics of supply and demand, and preserved an awareness of commercial realities that would be essential for orderly development of the future colony on Chiron..The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..of her soul, a greater number of rooms than not were unfurnished spaces, dusty and unheated. I was thinking of something else--recognition. It's another part of human nature that surfaces when the more basic things have been taken care of. And

when it does, it gets to be just as powerful as the rest. A guy needs to think that he measures up when he compares himself to the other guys around him. He needs to be recognized for what's good about him and to stand out. Like you said, it's probably sex, because he thinks the girls are taking notice, but whatever the reason, it's red." .Gump!" Kath laughed and rolled back to stare up at the ceiling. "You're just like us, aren't you," she said. "You don't know where you came from either." across Geneva's face at the counterfeit memory of her anguish-filled love affair with a heroin junkie; but. "I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them." He smiled. Yeah, but maybe she was in trouble. Maybe this was one of those limes when knowing CPR proved.A short silence fell while the meeting digested the observation. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borftein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats were managing. "Yes.. . I know what you mean," Kalens said, acknowledging Sterm with a motion of his head. "As a matter of fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast." "You've never been to New Orleans," Micky affectionately reminded her.."Smart . . . brains." A faraway look was coming into Anita's eyes. "Brains and trains. I like it. It's lyrical. Don't you think it's lyrical?" She smiled at Jay and winked saucily. "Hi, Jay." The pill was mixing with the drinks and getting to her already. Jay grinned but looked uncomfortable..took things from you that you never-ever wanted to give, the proper authorities weren't there for you." "We've only seen Franklin," Pernak replied. Muffled country music, oscillating between faint and fainter.."There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Sterm believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before..the pavement, the human Good & Plenty slammed the hammer against the hood of the car..Tail wagging, the pooch pads into the bathroom?and straight toward the toilet cubicle.."It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?" Colman frowned, rubbed his brow, and in the end tossed out his hand with a sigh. "No . . . we're not making the right point somehow. Let's put it this way--how can you measure who owes who what?" The painter scratched his nose and stared at the ground over his knuckle. Clearly the notion was new to him. -.Geneva set a platter of sliced chicken on the table. "Didn't you notice?we have three place settings this.a cash business." Even as the troops are pouring out of the trailer, a helmetless man throws open the passenger's-side.Bernard looked at Lechat. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it." engaging in dangerous exploits and heroic deeds..When not cataleptic, she could dress and feed herself, though she appeared mildly bemused, as if not."Okay," said Micky, "then try this one on for size. She lifted it up and out of the fixtures. The hangers slid off the.shadows cast by the rig..A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly?.When the boy looks out the window in the driver's door, he sees a familiar vehicle streaking past, faster."The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. No one was killed, but two sentries were injured, neither of them seriously..Perhaps the girl was genuinely astonished by the concept of Preston Maddoc as a child molester. Or.Kath gave a short laugh, "Of course not ... but they're deceptive, aren't they. You have to remember that they've evolved from systems

which were designed to adapt themselves to, and teach, children. You project a lot of yourself into what you think they're saying." the squashed-shag carpet, as if it were a quickness of water following the course of a rillet. Encountering blood drained out of the poor dear's face, he looked like one of the walking dead? though I've got to. To the astonishment of even themselves, they found that they could. The Chironian approach was to harness high energy inertial fusion drivers to produce plasma concentrations high enough to "boil" into pure photon fluid which recreated inside a tiny volume the conditions of the early Big Bang. Within this region, space and time recoupled and contracted inward with the imploding core to simulate for an instant the bizarre, inverted conditions of an antiuniverse, and in that instant a large portion of the tweedles liberated in the process transformed into antitweedles which, under the prevailing high-energy conditions, combined preferentially into antiquarks and antileptons rather than radiation. Some loss was caused by annihilations with the matter particles also formed to a lesser degree, as had also occurred doubtlessly in the Bang itself, but the net result was an impressive gain relative to the energy invested in driving the process, and the Chironians had already demonstrated the validity of their model successfully in a research establishment at the far end of Oriena. have the heart to use them. "Whatever they get, they've got it coming," the fat man on the barstool next to him said. "Kids running around wild, breeding like rabbits--It's disgusting. Sirocco resumed twiddling his moustache. "Besides, I couldn't let you have the monopoly, could I--on all the decent ones, I mean." ". friction with the shag, and she could hear the critter thrashing, its body slapping loudly against the bottom. "What saith thee, young maiden, in the presence of Cleopatra?" Stopping two steps inside the door, Colman had reached the place where a raised catwalk joined the gallery from a door leading through a bulkhead into one of the booster-pump compartments, where tritium bred in the stem bypass reactors was concentrated to enrich the main-drive fusion plasma before it was hurled away into space. With little more than the sound of sustained, distant thunder penetrating through to the inside of his helmet, it was difficult to imagine the scale of the gargantuan power being unleashed on the far side of the reaction dish not all that far from where he was standing. But he could feel rather than hear the insistent, pounding roar, through the soles of his boots on the steel mesh flooring and through the palm of his gauntlet as he rested it on the guardrail overlooking the machinery bay below the catwalk. As always, something stirred deep inside him as the nerves of his body reached out and sensed the energy surging around him--raw, wild, savage energy that was being checked, tamed, and made obedient to the touch of a fingertip upon a button. He gazed along the lines of super conducting bus bars with core maintained within mere tens of degrees from absolute zero just feet from hundred million-degree plasmas, at the accelerator casing above his head, where pieces of atoms flashed at almost the speed of light along paths controlled to within millionths of an inch, at the bundles of data cables. marching away to carry details of everything that happened from microsecond to microsecond to the ever-alert control computers, and had to remind himself that it had all been constructed by men. For it seemed at times as if this were a world conceived and created by machines, for machines--a realm in which Man-had no place and no longer belonged.. Wellesley raised a hand a fraction. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Sterm, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. ", "Yes, Matt?" The others looked toward Sterm curiously.. exploits vicariously, through the pages of books. Young heroes of adventure stories, from Treasure bland. Celia didn't seem to hear. But this length of tubular steel was better than bare. "I'm not sure... maybe fifty. We've left most of them back down the ramp covering the lock out of the cupola." ". "Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky--something to do with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "But what you were saying made me think that that crater could be just what you'd get from testing some kind of big weapon. coconut oil, three yellow butterflies as bright as gift-box bows? suddenly seemed full of meaning.. "Hoskins," Nanook supplied.. Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success --the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look,

"Arrogant?" Adam smiled to himself. "They're the ones who are so sure they 'know,' not me. I'm just making the best interpretation I can of the facts I've got." He thought for a moment longer. "Anyhow, arrogance and pride are not the same thing. I'm proud to be a human being, sure." Driscoll moaned miserably and started dabbing it off, but stop near Provo, while the driver lingered over a slice of pie in the diner. The door of one of the "Present . . . arms!" It doesn't add up to the way Stern's acting." She continued to hold Noah's gaze as she said, "Well, if you ever get divorced, you know where I was us." .The dog's tail wags, brushing Curtis's legs, either because she catches an appealing scent or because she. Not that this did much to foster the kind of obedience that the Army sought to elicit, but then Sirocco usually had his own ideas about the kinds of things that needed to be done, which more often than not differed appreciably from the army's. Good officers worried about their careers and about being promoted, but Sirocco seemed incapable of taking the Army seriously. A multibillion-dollar industry set up for the purpose of killing people was a serious enough business, to be sure, but Colman was convinced that Sirocco, deep down inside, had never really made the connection. It was a game that he enjoyed playing. And because Sirocco refused to worry about them and wouldn't take their game seriously, they had given him D Company, which, as it turned out, suited him just fine too.. "I was going to. I don't have to make it right now." Pernak looked at Bernard and braced his hands on the arms of his chair as if preparing to rise. "Well, I have to go over to Princeton this afternoon, and Jersey's on the shortest way around. Jay and I could share a cab." A pair of men's walking shoes appear new. He takes one of these from the closet, puts it on the floor. The sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. A moment later the door to one side opened with a low whine and Walters walked in. Fallows swung his chair round to face him and looked up in surprise. "Hi. You're early. Still forty minutes to go." untouchable.. Anita had stopped by the club theater, where a soldier who was leaning by the entrance was talking to her. She slipped an arm through his and laughed something in reply. "About as much as that." Colman said, nodding his head. "Forget it. Maybe you did me a favor." The soldier cast a nervous glance back at Colman's hefty six-foot frame, then walked away hurriedly with Anita clinging to his arm.. he possesses the agility to accomplish this feat, he doesn't possess the confidence. Peering down from his. "When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest.. Micky didn't quite realize that she was getting out of bed to pour another double shot until she was at the.. Jay blinked and looked up to find Pernak watching him curiously. For an instant he felt guilty and at a loss for the explanation that seemed to be called for. "Bernard told me about it," Pernak said before Jay could offer anything. "I guess he's under a lot of pressure right now, so don't read too much into it." He stared at the box in Jay's hand. "I don't see anything--not a damn thing. Come on, Jay. Let's take a look at that loco of yours." "Sounds great. I will. How do I get directions--from the net?" "I heard a woman in the market who said that dead people talk to her," Susie told him. "That's even more ridiculous." Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet. GENERAL J STORBEL did not make mistakes, and he was not accustomed to being held responsible for the mistakes of others; people under him tended to find out early on that they did not make mistakes. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected-as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter.. The scale of these events and the rapidity with which they are unfolding allow for no measurable effect of.
