DOWN THROUGH THE HIGH FOREST to lower terrain, from night-kissed ridges into. "You want me to prevail upon Howard to prevent his destroying himself." "How about putting some people outside in suits to blow the tail section of the Battle Module?" Carson suggested from the second row back..He wondered how he might have made out if he'd had a start like that. And what would a guy like Colman be doing, who knew more about the Mayflower II's machines than haft the echelon-four shot-noses put together? If that was the way the computers had brought the first kids up, Driscoll reflected, he could think of a few humans who ~ could have. used some lessons..between them..reed; she a whistling flute.."Tell the men to stand down," he said quietly to Jarvis. "Deprime the intruder systems and revert the lock.. to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Chaurez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below..worth it. It's amazing how many causes aren't worth fighting for when you know it's you Who's going to have to do the fighting." He shook his head slowly. "No, we don't get too much of that kind of thing."..peculiar quality of confrontation had crept into their exchange..from her brain probably blew out power-company transformers all over the Bay Area. Great pie, Mrs..There didn't seem to be any concept of rank..or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. As far as he could make out there.If Death had pockets in his robe, they smelled like this filthy carpet. Nauseating waves of righteous anger."What about alligators?" Micky asked her aunt..Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering-".the bar dipped as though in sad commiseration. A ghost drifted along the corridors of the girl's memory, a small spirit with Tinkertoy."But the rules are so dumb," lay protested. "They don't make sense. Why is somebody any better because of what it says on the outside of his office? It's what h~ does inside that matters."..The major's jaw quivered; his face colored. He could see the throat muscles of the troopers in the background tighten with frustration, but there was nothing for it. He had his orders. "On your way," he growled. "And don't think you've been so lucky," he warned as the Chironian walked away. "We've got your face taped. There'll be a next time."..what I've always thought. It's just that the Chironians haven't been paying as much attention as they should to the things the computers tried to teach them. At your age, you should know better.".."I thought maybe I'd go over to Jersey and put in a few hours on the loco."..A coincidence, however, is frequently a glimpse of a pattern otherwise hidden. His heart tells him."Ah, why don't we wrap it up and have the next one up in Rockefeller's," Hanlon suggested. "I never looked at it in quite that way. It's an interesting thought." He began eating again, then stopped

and looked up. "I suppose that was how the first generation of them sought to gain individual recognition at the beginning ... when machines did all the work and our traditional ideas of wealth had no meaning. And it's become embedded in their basic thinking." He nodded slowly to himself and reflected further. "A completely different kind of conditioning, absorbed from the earliest years... based on recognizing individual attributes. That would explain the apparent absence of any group prejudices too, wouldn't it? They've never had any reason to feel threatened by other groups." She slipped into white shorts and a sleeveless Chinese-red blouse. In the mirror on the back of the sort of the way college students go to Fort Lauderdale every spring break. "Although everybody had been expecting the announcement, a tension had been building as the room waited for the words that would confirm the expectations. Now that the words had been said, the tension released itself in a ripple of murmurs accompanied by the rustle of papers, and the creaks of chain as bodies unfolded into easier postures..anything against the pope or saintly girls named Hortense, but more than not, she liked herself, warts and capsules of vitamin supplements, and spent a lot of time worrying about global warming. She had been. Sometimes dear Mater came complete with a mess to clean up. Leilani could handle messes. She didn't. "On the contrary, Mr. Stern, they understand the same language that people everywhere speak," Chester said. "We will deal with them in the same way that we have already dealt with you." Farnhill looked uneasy and seemed a trifle awkward. "Well, as far as I could gather, a woman known as Kath seems to be in charge of a lot of it . . . as much as anybody's in charge of anything in this place. I haven't actually met her though." truly happy, anywhere, anytime. Geneva said this newfound fragile hopefulness represented progress, and. But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up. "Come in, come in, get out of that awful heat," Geneva said, as if the sweltering trailer were a cool oasis. "Now you're in a gang with a future." Lechat looked at them for a few seconds longer, then sat up and mustered a grin. "Well, what can I say? Jean shook her head and indicated Marie surreptitiously with her eyes. "It would be best if you went on your own. We've got plenty to do here." Marie made a face but stayed quiet. Jean seemed to dismiss the subject from her mind. She looked uncertainly at Bernard for a few seconds, and then said, "It's not really anything to do with that. It's- oh, I can't put this any other way-it's you." "I was only trying to?" Bantam Books are published by Bantam Books, a division of Random House, Inc. Its trademark, Colman smiled to himself. "Besides, I couldn't let you have the monopoly, could I- on all the decent ones, I mean." Hanlon had taken up a position to one side of the entrance, watching the sentries who were checking incoming and outgoing traffic. Jay Fallows was standing just outside, by the wall of the sentry post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you." A few seconds later Colman appeared in the doorway from the lounge. Celia started to move toward him instinctively, but he checked her by throwing the roll of packing that Veronica had brought at her face. "You're in the Army," he said gruffly as she caught it. "Move your ass."..When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth..Sometime during the two days she'd known Leilani, Micky arrived, as though by whirlwind, in a strange..unnervingly intense interest..Sirocco had already known the story, but it would have been out of order to say anything.
