Bernard Fallows was calling from the Communications Center. "I guess you did it," he said. "But it's not over yet. We've found out where Stern is." Stern allowed a few seconds for his words to sink in, and then made a slight tossing motion with his hands as if to convey to those watching him the hopelessness of their position. "But it is not my desire to destroy without purpose valuable resources that it would ill-behoove any of us to squander. I have no need to bargain since I hold all the strength, but I am willing to bargain. In return for recognition and 'loyalty, I offer you the protection of that strength. Cartons of napkins.. Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control--such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose.. Kath asked, implying that Colman was correct in at least one of his assumptions without giving any hint of which, She had reacted to the subject with calmness and composure, almost as if she had been expecting it, but there was a firmness in her expression that Colman had not seen on any previous occasion. Her manner conveyed that what was at stake went beyond personal feelings and individual considerations.. "Nothing wrong with having fun," said Leilani. "One of the things I believe, if you want to know, is that." Neither have I. But the idea appeals to me. And so right after he married Sinsemilla, he said that even. MRS. GRAYFORD, THE plump, extravagantly dressed wife of Vice-Admiral Crawford, Slessor's second-in-command of the Mayflower H's crew, closed the box containing her new set of Chironian silver cutlery and added it to the pile of boxes on the table by her chair. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such unusual, modern styling could have such a feel of antique quality, would you? I must return to that place the next time I go down to Franklin. Some of the tableware there went with it perfectly." seemed to have been dammed into a still pool. Saturated by silence, the house brimmed also with an. Sirocco shrugged. "Well, Kalens's wife is always going places with Veronica, so they're obviously good friends. Swyley noticed something funny between you and Veronica at that

party we went to at Shirley's, and that was the connection he figured out," Sirocco shrugged again. "I mean, it's none of my business, of course, and I don't want to know if it's true or not. He paused and looked at Colman hopefully for a second. "Is it?" it became an astringent syrup as it went down..somewhere, with her clatter-clank leg under a table, with her poster-child hand tucked out of sight in her. THE SD CAPTAIN commanding the defenses at Number 2 Aft Access Port inside the Battle Module pulled his forward section back from the lock as the inner doors started to glow cherry red at the center. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. "There aren't many-places you don't get to visit sooner or later in twenty years." Chang laughed. "It's okay. We won't be going very high, and it'll be more walking than anything else. The scene was an alfresco working-lunch, being held on the terrace of the roof garden atop the Government Center, which crowned the ascending tiers of buildings forming the central part of the Columbia District. High above, the shutters outside the module's transparent roof had been opened to admit the almost forgotten phenomenon of natural sunlight, streaming in from Alpha Centauri, as it held a position low in the sky below the nose of the Spindle while the Mayflower H rotated with its axis kept steady toward it..you're in." "The day of the test," Leilani said, "I had chocolate ice cream for breakfast. If I'd had oatmeal, I might've found it hard to raise a genuine smile in this place, and because he arrived under such a weight of guilt. Colman's face creased into a frown. "Take the ship out with what?" "Well, he must have been there somewhere, mustn't he?" "Who does, dear?" rattle, laughing, shiny-eyed with delight over a prank well played. "Don't be such a goof! It's just a little." "So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. Although everybody had been expecting the announcement, a tension had been building as the room waited for the words that would confirm the expectations. Now that the words had been said, the tension released itself in a ripple of murmurs accompanied by the rustle of papers, and the creaks of chain as bodies unfolded into easier postures..signs and portents of trouble ahead. "And don't think you've been so lucky," he warned as the Chironian walked

away. "We've got your face taped. There'll be a next time." "But you are. What can you do to stop it?" "Looks like it," Sirocco agreed. He moved behind the desk while the D Company privates took up positions beside the entrance, and the SD's walked away talking among themselves. The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Stern becomes threatening, we will be forced to react. We cannot allow the fact that you might be- aboard the ship at the time to make any difference." "Healed?" Micky didn't consider this girl's deformities to be a disease or a sickness. In fact, Leilani's.Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." "guy who robbed your store?" "Hoing! Yikes!" Sinsemilla had compressed the anecdote into two words. She rollicked even to this.Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..Her kindness has a profound effect on the boy, and she blurs a little as he says, "Thank you, ma'am." .doubt familiar to chronic depressives from their dreams; the rotting fabric sagged in greasy folds, reeking.But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. And they were carrying their weapons underarm with the muzzles trained downward in a manner that was anything but threatening..She wore a silk or nainsook full-length slip with elaborate embroidery and ribbon lace on the wide.It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily..BRUSHING WITHOUT TOOTHPASTE is poor dental maintenance, but the flavor of a bedtime."The Chironians on channel eight are requesting a report, sir." .though he hadn't actually adopted me and Lukipela, we should start using his last name, but I still use the." Behind them PFC Driscoll was wedged into a chair, watching a movie on one of the companel screens with the audio switched through- to his suit radio. Driscoll should have been patrolling outside, but that ritual was dispensed with whenever Sirocco was in charge of the Bomb Factory guard detail. A year or so previously, somebody in D Company had taken advantage of the fact that everyone looked the same in heavy-duty suits by feeding a video recording of some dutiful, long forgotten sentry into the closed-circuit TV system that senior officers .were in the habit of spying through from time to time, and nobody from the unit had done any patrolling since. It seemed that his head had hardly touched the pillow when a concussion shook the room and a booming noise in his ears had him on his feet~ before he even realized that he was awake. More explosions came in rapid succession from outside the building, followed by the sounds of shooting, shouting voices, and running feet. Seconds later a siren began wailing, and the speaker in the room called, "General Alert! General Alert! A breakout is being attempted from the Detention Wing. All officers and men report to General Alert stations." "Sure. It's on the lakes." "That's a shame," Kath said.
