

TERRA MARIAE MEDICUS 1953

"What does that mean?" Driscoll asked, looking at the Chironian who had spoken. While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. AJ1 of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. "We ought to commence evacuating the Kuan-yin," Kath said. "It looks as if it could be dangerous up there very soon." The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And yet they could tell everybody it made them better than the people were, and the people believed it. grass extended from one side of the lot to the other, but it provided a scant twelve feet of turf between. "Thank you, dear. It's a Martha Stewart recipe. Not that she gave it to me personally. I took it down. Ridiculous. They aren't the type to play games. They're vicious and efficient. If they were here now, he'd." Howard Kalens, no doubt about it," Bernard Fallows was saying. "If we've only got two years to knock the place .. into shape, he's just the kind of man we need. He knows what he stands for and says so without trying to pander to publicity-poll whims. And he's got the breeding for the position. You can't make a planetary governor out of any rabble, you know." "When he has to explain where Luki's gone, what'll he say?" Geneva wondered. "The woman is either nuts or higher than a Navajo shaman with a one-pound-a-day peyote habit." gasps for breath, and the cool air is rough in his raw throat. Colman sighed. "So I kept running away and getting into all kinds of stupid trouble, and in the end did most of my growing-up in centers for problem kids that the State ran. Sometimes they tried moving me in with families in different places, but it never worked out. The last ones tried pretty hard. They adopted me legally, and that's how I got my name. Later we moved to Pennsylvania . . . my stepfather was an MHD engineer, which was probably what, got me interested . . . but there was some trouble, and I wound up in the Army." "Sure. What could be crazier than the Army?" chunky cockroach with crushed-glass sprinkles." Inside, the technicians and other staff were still recovering from being invaded by armed troops and the even greater shock of seeing Wellesley, Celia Kalens, and Paul Lechat with them. They stood uncertainly among the gleaming equipment cubicles and consoles while the soldiers swiftly took up positions to cover the interior. Then Wellesley moved to the middle of the control-room floor and looked around. "Who is in charge here?" he demanded. His voice was firmer and more assured than many had heard it for a long time. Jesus, he thought, he was sick of the system. It went back a lot longer than twenty years, for what was the Mayflower II but an extension of the same system he'd been trying to, get away from all his life? lay was beginning to feel the trap closing around him already. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it. In addition to surprise, however, the boy has Old Yeller. And the dog has teeth. Curtis has teeth, too. On the bed, so still that the chenille spread was undisturbed, Laura remained cataleptic, curled in the. "Even though he kills old ladies and boys in wheelchairs?" "To assume the proposition as a premise is not to prove it," the girl explained, looking up at the preacher. "Your argument, I'm afraid, is completely circular." Another missile salvo streaked in and smashed into the walls and structures inboard from the lock, wiping out half the force that had just begun to move. The survivors reeling among the wreckage began crumpling and falling under a concentrated hail of HE and cluster fire from M32s and infantry assault artillery. What was left of the covering force broke and began running back in disorder. "Get everybody out! Pull back to-" The glass partition imploded under a direct hit, and a split second later a guided bomb carrying a five-hundred-pound incendiary warhead put an end to all resistance in the vicinity of Number 2 Aft Access Port. Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Stern an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Stern for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away." "Well, that's something, anyway," Sirocco said. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away.

We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve," .miracle. Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." say to make him leave. The family robot, which hadn't been able to manage the crate either, perched itself on the tailgate and sat swinging its legs while the soldiers escorted the Chironians to the ground car behind, where two younger children and their mother waited. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. "Lock clear for exit," Sirocco called to the cabin below. '~Carry on, Guard Commander," Colonel Wesserman replied from the depths.. "They soon find out," Juanita said it as if it explained everything.. "Ahem . . ." General Portney cleared his throat. "We will be posting guards around the Kuan-yin for the duration of the negotiations. I trust there will be no objections." A dog. Black and white. Shaggy.. "Shuddup," Colman hissed.. To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley?. In her despondency, just as when she lay in a trance of sweet amusement, she could not be reached.. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible color charges as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeples" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..1.
