Roke Island, the Bay of Thwil. Early knew of the harbor from the maps in Havnor, and knew there. Who found his way to work his will. "I won't sail my boat across Havnor, dear love. I plan to go around it. By water." He could always make her laugh; he was the only one who could. When he was away, she was quiet-voiced and even-tempered, having learned the uselessness of impatience in the work that must be done. Sometimes she still scowled, sometimes she smiled, but she did not laugh. When she could, she went to the Grove alone, as she had always done. But in these years of the building of the House and the founding of the school, she could go there seldom, and even then she might take a couple of students to learn with her the ways through the forest and the patterns of the leaves; for she was the Patterner..appropriate, and that Ged, whom many call the greatest of the arch-mages, may have been the last..onto a moving walkway. And he stalked off towards the Overfell, angry with the boy for coming and with himself for giving in; but it was not anger that made his heart pound. Striding along-he could stride, then-with the seawind pushing at him always from the left and the early sunlight on the sea out past the vast shadow of the mountain, he thought of the Mages of Roke, the masters of the art magic, the professors of mystery and power. "He was too much for 'em, was he? And he'll be too much for me," he thought, and smiled. He was a peaceful man, but he did not mind a bit of danger..Some people of great innate and trained power are able to find out the true name of another, or even to have it come to them unsought. Since such knowledge can be betrayed or misused, it is immensely dangerous. Ordinary people-and dragons-keep their true name secret; wizards hide and defend theirs with spells. Morred could not even begin to fight his Enemy until he saw his Enemy's name written in the dust by the falling rain. Ged could force the dragon Yevaud to obey him, having by both wizardry and scholarship discovered Yevaud's true name under centuries of false ones..at the old sites. Sleeping out on deck with the starlight on his face, he had a simple, vivid dream: it was beginning of time, is presumably an infinite language, as it names all things. I avoided those insect arms stretched out to serve me, loaded with delicacies, which I Morred's people against him. Crying out that their king had betrayed them, the villagers of Enlad. "I don't know," said the Doorkeeper. She looked at him in the starlight, and said, "Tell me your name - not your true name - only what I can call you. When I think of you." She pitied and honoured him. She wanted to warn him of the peril he was in. But no words came to defined in Hardic; but it is better to say that the runes are not words at all, but spells, or wizards' spells were made, was the word tures. He had said it meant semen. She'd never known a man to look after. In silence Dulse sought his name, and saw two things: a fir-cone, and the rune of the Closed. Berry went and fetched his sister, after he had heard Sunbright's tale at the tavern, and San's version of it, and several other versions already current. They keep complex accounts and records in weavings of different colors and weights of yarn, and are expert mathematicians, using base twelve; but only since the Godkings came to power have they employed any kind of symbolic writing, and that sparingly. Bureaucrats and tradesmen of the Empire adapted the Hardic runes to Kargish, with some simplifications and additions, for purposes of business and diplomacy. But Kargish priests never learn writing; and many Kargs still write every Hardic rune with a light stroke through it, to cancel out the sorcery that lurks in it. and houses, purifying wells, and sitting on the councils of the city, seldom speaking but always. Highdrake took Medra as his student, gratefully. "I was taught my art by a mage who gave me freely all he knew, but I never found anybody to give that knowledge to, until you came," he told Medra. "The young men come to me and they say, "What good is it? Can you find gold?" they say. "Can you teach me how to make stones into diamonds? Can you give me a sword that will kill a dragon? What's the use of talking about the balance of things? There's no profit in it," they say. No profit!" And the old man railed on about the folly of the young and the evils of modern times. It didn't seem to him to amount to much. It was such an easy matter to him to make a silvery light. And, just as in the now of the so-called real world, I didn't know what would happen next. You must make your choice alone, as a man. Do you understand that?" Golden was earnest, seeing his chance to begin to wean the lad from his mother. She as a woman would cling, but he as a man must learn to let go. And Diamond nodded sturdily enough to satisfy his father, though he had a thoughtful look. She was looking down at her hands, clasped now on her knees. In the faint reddish glow of the cabin lantern her lashes cast very delicate, long shadows on her cheeks. She looked up, straight at him. "My name is Irian," she said. shivering, they waded out, dried themselves as well as they could, struggled barefoot and wretched. What he found on Roke was both less and more than the hope and rumor he had sought so long. Roke Island was, they told him, the heart of Earthsea. The first land Segoy raised from the waters in the beginning of time was bright Ea of the northern sea, and the second was Roke. That green hill, Roke Knoll, was founded deeper than all the islands. The trees he had seen, which seemed sometimes to be in one place on the isle and sometimes in another, were the oldest trees in the world, and the source and center of magic. "Years back.
